with the best results, and the commissioners will adhere to the policy of allotting lands where the same can be legally done and the condition of the Indians is such as to warrant it.

An amendment to the law in reference to intruders, so as to punish by imprisonment as well as fine, is absolutely necessary. The Commissioner gives a detailed account of Payne's operations, and asks that the special attention of Congress be called to these agressive movements on the Indian Territory lands as illustrating the urgent necessity for speedy and effective legislation in regard to trespassors.

The recommendations for legislation for the protection of timber on Indian lands are renewed.

During the year there was said Indians in each, as annuities and otherwise, \$740,000. Less than \$200,000 of this amount was for the payment of annuities proper, many of which will expire in the near future by limitation in various treaties.

The increase in the accommodations for Indian pupils, which the school appropriations for the last fixed year made possible, has been followed by a corresponding increase in the attendance of pupils. Exclusive of five or six tribes, the number enrolled at boarding-schools during the year just closed is 5743, an increase of 654 over last year. The attendance in day schools on the reservations have made a creditable record. Eight new boarding schools have been opened, making the whole number now in operation, exclusive of training schools, ninety-seven. An interesting event in the year has been the educational irroad in the Ute tribe.

The Commissioner continues on the subject of education at great length and pays a high tribute to the work of the Church among the Various tribes.
